My Candy Store Application

Team Members:

1 Naishal Chauhan (nc882@drexel.edu)
2 Anil Kumar Karapa (ak4448@drexel.edu)

Project Overview:

We propose to develop "My Candy Store," a functional and user-friendly mobile application designed for candy stores. While the initial focus will be on candy, the platform will be flexible enough to serve any type of retailer and customer, facilitating the buying and selling of various products.

Key Features:

1. Product Display:

   - Visually appealing display of available items

   - Detailed information about each product, including pricing and descriptions

2. Shopping Cart:

   - Easy addition of items to the cart

   - Automatic calculation of total prices

   - Seamless order placement process

3. User Authentication:

   - Secure login and registration

   - Profile management allowing users to edit their personal information

4. Backend Integration:

   - Robust backend to store and manage data efficiently

   - Ensure data security and integrity

By developing this application, we aim to create a versatile platform that enhances the shopping experience for customers and simplifies the selling process for retailers.
